

Andrew Weinberg

Principal Technical Program Manager

Greater Nashville, TN | 615-587-9684 | andywe@outlook.com | andrewweinberg.us | linkedin.com/in/andyweinberg

PROFESSIONAL SUMMARY

Principal Technical Program Manager with 25+ years delivering complex, high-stakes technology programs across healthcare, SaaS, enterprise infrastructure, and financial services. Recognized for turning operational chaos into structured, measurable outcomes — whether mitigating seven-figure daily risk, moving hospital systems with 12 hours of downtime, or architecting infrastructure that scaled to global Top 10 website status. Extensive experience leading M&A integrations and divestitures across healthcare and enterprise technology — from full hospital system separations to multi-acquisition SaaS onboarding — with a proven ability to protect business continuity and drive value realization through transition. Equally fluent in the engineering room and the C-suite; trusted by executives to make risk visible, frame tradeoffs clearly, and deliver.

CORE COMPETENCIES

Program and Portfolio Management | M&A Integration and Divestitures | Disaster Recovery / Business Continuity (DR/BC) | Enterprise Architecture | Agile, Scrum, ITIL | Healthcare IT (Epic EMR) | Stakeholder Management | Change Management | Executive Reporting | Vendor Management | Strategic Roadmaps | Budget and Risk Management | Statements of Work (SOW) | Program and Project Charters | Dependency Tracking | Conflict Resolution | IT Strategy and Governance | Infrastructure Transformation | Cybersecurity Programs | Team Management | AI-Assisted Program Management | Prompt Engineering | Workflow Automation

PROFESSIONAL EXPERIENCE

Technical Program / Project Manager, M&A Integration

Inseego Corp. | Remote | Jun 2026 - Present

- **Leading 3 of 5 major IT workstreams for Inseego's acquisition of Nokia's Fixed Wireless Access division** — transforming Inseego from a U.S.-only organization into a global enterprise spanning 20 countries across End User Computing & IAM, Networking & Infrastructure, and Security & Compliance.
- **Navigating one of the most complex multi-jurisdictional regulatory environments in enterprise M&A**, coordinating heavily with legal and security teams to address U.S. Export regulations and technology restrictions, GDPR, China state regulations, and India DPDP — simultaneously across all three workstreams.
- **Driving full-stack integration across interdependent technical domains**, including M365 migration, SSO/MFA rollout, MDM deployment, cloud services, security tooling, application discovery and licensing, physical and virtual lab moves, and new overseas office buildouts across 20 countries.
- **Architecting and delivering a multi-country private cloud infrastructure for engineering**, establishing a globally distributed compute environment to support Nokia FWA engineering operations post-acquisition across multiple international sites.
- **Owning TSA specifications and service disposition transfers** while integrating legal and security requirements into operational readiness processes and architecture — ensuring compliance does not lag execution.

Technical Program Manager

Enrichment Investments I | Las Vegas, NV | Aug 2025 - Present

- **Drove 23% overall business improvement** by leading simultaneous POS modernization, ERP/CRM customization, and operational excellence programs — transforming how the business runs at every layer from storefront to back-office.
- **Identified and opened new market segments** through structured business analysis, directly expanding the company's addressable revenue base beyond its original footprint.
- **Built a comprehensive security program from the ground up**, covering physical access control, surveillance infrastructure, and logical cybersecurity protocols — eliminating previously unaddressed organizational risk exposure.

- **Transformed large-scale delivery logistics operations**, redesigning fulfillment workflows, vendor coordination, and supply chain sequencing to support accelerated growth.

Project Manager

Penn State Health | Remote | Jun 2025 - Aug 2025

- **Stood up the phase 1 framework for a health system-wide DR/BC program**, developing scorecard metrics and readiness criteria across merger entities — giving leadership its first structured picture of organizational risk exposure.
- **Coordinated vendor resources, technical teams, and C-suite stakeholders** across a complex multi-entity environment, ensuring HIPAA and governmental regulatory alignment throughout.

Project Manager

PSEG Long Island | Remote | Nov 2024 - Feb 2025

- **Delivered a clean Windows 11 enterprise migration plan for a major utility**, optimizing vendor partnerships, building a rigorous WBS, and maintaining executive-level visibility through comprehensive communication plans.

Principal Project Manager

Thomas Jefferson University / Einstein Healthcare Network | Remote | May 2022 - Dec 2023

- **Led datacenter transformation, DR/BC strategy, and infrastructure modernization** for a major Philadelphia-area health system — managing vendors, budgets, third-party resources, and weekly C-suite reporting across the full program lifecycle.
- **Ensured Epic EMR interface continuity and QA across facility moves** during a complex M&A integration into the TJU system — protecting clinical workflow stability throughout the transition.
- **Managed unanticipated platform-wide technical debt**, leading architecture restructuring efforts to resolve systemic issues while maintaining program forward momentum — resequencing workstreams and dependencies to absorb the additional scope without schedule collapse.
- **Owned migration cutover planning, execution, and end user acceptance**, coordinating all readiness activities, go/no-go criteria, rollback procedures, and post-cutover validation across technical teams and clinical stakeholders.

Program Manager, Infrastructure & Security

Qualifacts Inc. | Nashville, TN | Dec 2019 - Mar 2022

- **Managed the infrastructure and security program portfolio for the #1 Behavioral Health EHR company in the US**, leading and mentoring a team of Project Managers across infra builds, cybersecurity remediation, application modernization, and tech debt reduction within defined portfolios.
- **Played a key role in creating the enterprise PMO**, establishing governance frameworks, delivery standards, and SDLC Agile oversight across development efforts to drive a full refresh of the entire SaaS product stack.
- **Successfully onboarded 2 acquisitions into the Qualifacts enterprise**, evaluating and integrating technology stacks, contractual assets, and operational teams without disrupting existing customer SaaS delivery.
- **Led SOC 1 and SOC 2 implementation programs** and directed threat detection and remediation operations through CrowdStrike Falcon Complete — hardening the organization's security posture across its cloud-hosted behavioral health platform.
- **Eliminated manual weekly executive reporting** by building automated PowerBI dashboards tied to the O365 suite — freeing leadership time and improving decision-making velocity.

Senior IT Architect / Program Manager

Ceres Terminals | Nashville, TN | Jun 2019 - Nov 2019

- **Restructured IT infrastructure and security posture**, aligning the technology roadmap with strategic business objectives and delivering measurable efficiency improvements within a compressed engagement.
- **Mentored existing technical staff** with emphasis on regulatory compliance awareness and DR/BC resilience — building internal capability for planning and executing business continuity programs beyond the engagement.

Technical Project Manager / IT Enterprise Architect

AHS / Ardent Health Services | Nashville, TN | Apr 2018 - Apr 2019

- **Executed one of the region's most complex healthcare M&A IT transitions** — migrating St. Francis Hospital and 13 offsite clinics from SCL Health to Ardent Health with only 12 hours of planned downtime across the full infrastructure.
- **Developed a project framework that was subsequently adopted enterprise-wide by AHS**, establishing a repeatable methodology for complex healthcare IT cutovers.
- **Coordinated Epic EMR disconnection and reconnection across two different interface engines and EPIC versions**, managing HIPAA compliance discovery and application recovery planning simultaneously.

Principal IT Architect

Franklin American Mortgage | Nashville, TN | Feb 2018 - Apr 2018

- **Strengthened DR/BC posture and system reliability** through Active Directory / O365 integration, Linux patching optimization, and storage vendor evaluation — all within a short-duration engagement.

Principal Technical Consultant

Vanderbilt University Medical Center | Nashville, TN | Jul 2017 - Nov 2017

- **Architected the Windows 10 endpoint strategy for 22,000 devices** across VUMC, advising on Epic EMR implementation, resolving Oncology wing wireless infrastructure issues, and supporting Active Directory split planning from the University IT infrastructure.

Senior Technical Services Architect / Product Consultant

iQuate | Dublin, Ireland | Apr 2016 - Dec 2016

- **Bridged the gap between customer field reality and product development**, serving as the primary SME translating live enterprise deployment experience into roadmap decisions — directly improving product stability and scalability using Agile/SDLC methodology.
- **Established ITAM process and policy best practices** for enterprise customers; delivered integrations across ServiceNow, BDNA, License Management, and Oracle; produced license compliance and vendor maintenance contract analysis.

Principal IT Architect / Engineer

Asurion | Nashville, TN | Aug 2007 - May 2016

- **Mitigated \$1.5M/day in EBITDA exposure** by leading a ground-up transformation of the back-end systems running Asurion's automated logistics shipping lines — reducing overall downtime by 80% and eliminating the primary risk driver.
- **Rebuilt repair operations center production lines from the ground up**, leading full retooling and workflow optimization that reduced operational device setup time by up to 55% — and shifted operations staff maintenance from reactive as-needed response to strategic, planned maintenance programs.
- **Built the enterprise-wide ITAM discovery process for all global Asurion sites**, leveraging full automation to achieve complete network asset visibility where none previously existed.
- **Consolidated dozens of independent physical security systems into a single enterprise solution**, designing and executing the physical security adoption program across the global footprint.
- **Drove 10-year IT organizational maturation**, integrating Agile, Scrum, and ITIL across service management, change management, and asset tracking — transforming IT from reactive to structured and scalable.

Senior Architect / Engineer, Windows Genuine Service

Microsoft | Redmond, WA | May 2005 - May 2006

- **Designed and operated a 300+ server infrastructure for the Windows Genuine service**, building a custom internal datacenter for OLAP/SSIS workloads spanning 7 licensing groups and 3 IT security teams.
- Designed and implemented SOX 404 technical controls on Windows Genuine licensing systems during Microsoft's original Section 404 rollout — access, change, and integrity controls on revenue-bearing licensing infrastructure.

Technical Manager, Software Assurance Group

Microsoft | Redmond, WA | Feb 2004 - Feb 2005

- **Directed development of an automated Software Assurance service for high-value enterprise clients**, driving cross-functional collaboration to improve service reliability and delivery.

Program Manager, MSN Operations

Microsoft | Redmond, WA | Apr 2000 - Feb 2004

- **Oversaw data center construction and led server migration initiatives** managing cross-functional teams and resource forecasting for enterprise-scale compute and storage with minimal downtime.

Program Manager, Windows Update

Microsoft | Redmond, WA | May 1997 - Apr 2000

- **Architected Windows Update's global infrastructure from inception**, designing the active-active datacenter model that scaled the service into a Top 10 global website and established early SaaS hosting standards industry-wide.
- **Collaborated with F5 Labs on DNS service enhancements** and authored datacenter optimization practices that were adopted broadly across Microsoft's web infrastructure.

EDUCATION

B.S., Cyber Security and Information Assurance (In Progress)

Western Governors University

Leadership Training

ChoiceCenter Leadership University | 2024

CERTIFICATIONS

- Certified ScrumMaster (CSM), Scrum Alliance
- Lean Six Sigma White Belt
- CompTIA Project+
- Project Management Professional (PMP), In Progress

TECHNICAL SKILLS AND TOOLS

Program tools: Jira, Confluence, Smartsheet, Microsoft Project, Power BI

Endpoint and infrastructure: Microsoft 365, Entra ID, Intune, SCCM, BigFix, Active Directory, ServiceNow

AI and automation: Microsoft Copilot (M365), Claude (Anthropic), ChatGPT (OpenAI), prompt engineering, Make (Integromat) workflow automation, Twilio, GitHub, WordPress
